PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with experience in the MERN stack and Python, focused on building scalable web applications. Strong problem-solving skills with the ability to develop efficient, user-friendly solutions. Effective team player with experience in collaborative and real-world projects.

EDUCATION

Government Engineering College
B.E. in Computer Engineering – CGPA: 7.43/10

Rajkot, Gujarat
2022 – 2026

- Relevant Coursework:** Data Structures, Algorithms, Web Development, Database Management, Computer Networks, Software Engineering

EXPERIENCE

Sanskar Technolab
Frappe / ERPNext Developer

Ahmedabad, Gujarat
April 2026 – Present

- Develop and manage custom DocTypes and implement server-side overrides within the Frappe monolithic architecture.
- Handle site management and application deployment utilizing Bench commands.
- Optimize request lifecycles and backend logic to customize ERPNext modules according to business requirements.

Esparkbiz
Full Stack Development Trainee

Ahmedabad, Gujarat
January 2026 – March 2026

- Completed Full Stack Development training at eSparkBiz, gaining hands-on experience in frontend and backend development.
- Developed working knowledge of MySQL for complex database management and integration tasks.

PROJECTS

SaaS ReviewGenAI | Next.js, FastAPI, PostgreSQL

- Developed a full-stack AI-based web application to generate and analyze user reviews via QR code scans.
- Built a highly responsive frontend using Next.js and implemented backend APIs with FastAPI for efficient data processing.
- Integrated PostgreSQL for structured data storage, ensuring high availability and secure data management.

URL Shortener | Node.js, Express.js, EJS, MongoDB

- Built a full-stack URL shortener web application utilizing Node.js and EJS templating engine.
- Implemented seamless functionality to generate short URLs, manage analytics, and redirect users to original links.
- Created an intuitive interface for users to easily manage, track, and view their generated shortened URLs.

Auto Passport Photo Editor | Python, PyQt5, OpenCV, Pillow

- Developed a performant desktop application to automatically generate passport-size photos for bulk processing.
- Implemented face detection and image processing algorithms using OpenCV for high-accuracy auto-cropping and resizing.
- Integrated automated background removal tools to produce clean, professional, and passport-ready images in seconds.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML/CSS

Frameworks & Technologies: Frappe, ERPNext, Flask, FastAPI, Node.js, React.js, Next.js

Databases: MySQL, MongoDB, PostgreSQL

Developer Tools: Git, GitHub, Postman, VS Code, Linux/Ubuntu
